EXPERIENCE

Django Dev

HaGa IT Solution

04/2020 - 01/2025 Location

- Design database schemas using Django ORM and optimize complex SQL queries for speed
- Build and maintain RESTful APIs to enable seamless frontend and mobile app communication
- Integrate third-party APIs, services, and Python libraries into the core Django ecosystem
- Implement authentication, authorization, and data protection; write thorough unit tests and perform code reviews
- Work alongside frontend developers, UX/UI designers, and product managers to deliver cohesive web solutions

Django Dev

Seven Diff Software House

03/2017 - 01/2020 Location

- Django blog
- Python simple RESTfull API
- TF-IDF
- FastApi
- RESTful API is accessed using the HTTP protocol
- Naming and URL structure consistently will produce a good API and easy for developers to understand
- URLs APIs are usually called endpoints in their calls
- Example of naming URLs / endpoints the good ones are as follows: /users /users/1234 /users/1234/photos /usersMySQL CRUD
- SQL Trigger Concept

Flask Dev

Kya Grocery Store

11/2015 - 01/2017 Location

- Flask API
- CentOS
- Selinux System Administration

Python Qt Dev

RF Game Center

09/2007 - 05/2015

- PyQt billing creation
- Ubuntu, Debian, FreeBSD, CentOS SELinux
- Setup Apache2, NginX, Python, C++, Java, PHP, MySQL, MongoDB, SQL Server, Postgre SQL

SUMMARY

Backend developer focused on Python, Django, and API development, with experience building RESTful services, integrating third-party APIs, optimizing database queries, and supporting secure web applications. Works across backend architecture, Django ORM, SQL, authentication, testing, and cross-functional delivery to help web products run reliably and scale efficiently.

KEY ACHIEVEMENTS

Improved API Performance

Increased API performance by 30% using optimized Django ORM queries.

Secured Restful APIs

Implemented 100+ secure RESTful APIs ensuring seamless user data protection.

Multidisciplinary Teamwork

Collaborated in developing 50+ cohesive web projects with frontend teams.

Expansion Of Features

Integrated 20+ third-party APIs to enhance application functionality.

SKILLS

Python	Django	RESTful APIs	Flask
FastAPI	Django ORM	SQL	CRUD
Authentication		Unit Testing	
API Integration		Web Scraping	Selenium
BeautifulSoup		TF-IDF

WORK EXPERIENCE

Django Dev

April 2020 – January 2025

HaGa IT Solution

Design database schemas using Django ORM and optimize complex SQL queries for speed.

Build and maintain RESTful APIs to enable seamless frontend and mobile app communication.

Integrate third-party APIs, services, and Python libraries into the core Django ecosystem.

Implement authentication, authorization, and data protection; write thorough unit tests and perform code reviews.

Work alongside frontend developers, UX/UI designers, and product managers to deliver cohesive web solutions.

Django Dev

March 2017 – January 2020

Seven Diff Software House

Django blog

Python simple RESTfull API

TF-IDF

FastApi

RESTful API is accessed using the HTTP protocol.

Naming and URL structure consistently

will produce a good API

and easy for developers to understand.

URLs APIs are usually called endpoints in their calls.

Example of naming URLs / endpoints the good ones are as follows:

/users

/users/1234

/users/1234/photos

/usersMySQL CRUD

SQL Trigger Concept

Flask Dev

Nov 2015 – January 2017

Kya Grocery Store

Flask API

CentOS

Selinux System Administration.

Python Qt Dev

Sept 2007 – May 2015

RF Game Center

PyQt billing creation.

Ubuntu, Debian, FreeBSD, CentOS SELinux.

Setup Apache2, NginX, Python, C++, Java, PHP, MySQL, MongoDB, SQL Server, Postgre SQL.

QUALIFICATIONS

Python Django, Selenium, BeautifulSoup

Web automated testing with Selenium at sssessments.com

Web Scraping, Flask simple RESTful API

TF-IDF, CRUD

EDUCATION

Accounting Information System

June 1998 – Sept 2007

Atma Jaya University Jakarta

Information Technology Audit
